

BUSINESS ETHICS & PRACTICAL PHILOSOPHY

ABOUT THE PROGRAM

The Business Ethics & Practical Philosophy program is designed to equip leaders with essential tools and methods for making smarter decisions, to learn better, and lead more effectively.

The program integrates the timeless wisdom of philosophy with the practical tools of business ethics to help leaders navigate complex business challenges and create positive progress in their organisations. In addition to the theoretical foundations of business ethics, participants will also develop practical skills such as critical thinking, communication, and problem-solving.

Through a combination of lectures, group discussions, and hands-on exercises, participants will gain practical skills and insights that they can apply immediately to their work. Participants in this program will learn how to apply practical philosophy to real-world business situations, including ethical dilemmas, strategic planning, and leadership development. Participants will gain a deeper understanding of their own values and how to align them with the values of their organisation.
